

**TRIDON® LAMINATE & VENEER SLITTER** A hand tool for cutting strips of high pressure decorative laminates and other plastics. Two opposing hardened steel rolling cutters score both sides of the sheet allowing the strip to be broken off easily by hand. Edge guide adjusts to cut strips from 1/2" to 4 5/16" wide (12 mm to 110 mm). Vertical spacing of cutters adjusts up to 0.080" (2 mm). Since no power is required, excellent for use at the workbench or in the field. Long handle for comfort and ease of use. Quick and easy to adjust edge guide. All structural parts are metal for accuracy and stability.

Cat. No. AT-109, Wt 4 lb Cat. No. AT-109020, Set of 2 Repl. Cutters

**TRIDON® CARBIDE TIPPED SCORING CUTTER** Use this tool to score and break a variety of sheet materials including decorative laminate, vinyl sheet, tile, Plexiglas, drywall, and many others. Especially useful when very long cuts must be made. Also useful on the job when available tools are limited and when there is no power. Use a straight edge as a guide, make several scores, then bend upward toward the decorative side for laminate, downward for most other materials. Also popular for removing grout from between ceramic tiles in preparation for regrouting. The reversible blade has a carbide tip on each end for double life.

Cat. No. SC-344, Length 6", Wt 3 oz Cat. No. SC-345, Repl. Blade, Wt 1 oz

**CARBIDE TIPPED SCORING CUTTER** This tool functions the same as the above scoring cutter but the straight style is preferred by some. Has two exposed carbide tips. Ribbed plastic handle gives good grip. Cat. No. DC-01, L 8", Wt 4 oz

**FOLDING SCORING CUTTER** Same function as above cutters. High-carbon steel blade folds safely into the plastic handle. Easily carried in a pocket. Disposable. Cat. No. SC-11, Length Closed 5", Wt 1 oz

**TRIDON® LAMINATE SHEAR** This is the most popular hand shear for cutting laminate. Three jaw design cuts without chipping. Make long or short cuts without trips to the saw. Very useful for quick cuts and fitting on the job, especially when power is not available. Designed to cut with decorative side up. Has compound action for easy cutting.

Cat. No. LS-85A, Length 9", Wt 1 lb

**OLD STYE LAMINATE SHEAR** Performs the same function as above shear, but is designed to cut from the underside of the sheet or with the decorative side down. This style is best for cutting laminate that has been formed toward the decorative side.

Cat. No. LU-90, Length 10", Wt 1 lb

**NIBBLING-TYPE LAMINATE SHEAR** Cuts almost any pattern in laminates such as notches, slots, and cutouts. Cuts straight, right, or left. Especially useful for fitting around irregular edges or outlets.

Cat. No. LN-86, Length 7", Wt 1 lb

**TRIDON® MITERING/MOLDING CUTTER** This cutter makes unbelievably smooth cuts on a variety of materials, shoe molding, plastic coving and T-molding, wood quarter round, half round, cabinet trim wood molding up to 1/2" thick, PVC tubing, and carpet tackless strip. It has a 90° cutting guide for clean butt joints and a 45° guide for neat mitering. It locks closed for safety. The 2 1/4" hardened steel blade is very sharp. A quality tool.

Cat. No. MK-45, Length 8", Wt 11 oz Cat. No. MK-45RP, Repl. Blade

**METAL MITER TOOL** Quickly and easily cuts a precise 90° notch out of vinyl, laminate, and up to 1/16" aluminum, and to a depth as much as 1". When folded at the notch, edge moldings form a perfectly mitered corner. When a radius is planned on T-moldings, remove two or more close notches from the barb at the portion to be curved. Made of precision hardened steel for a long service life.

Cat. No. MM-444S, Complete Handle & Die Set, Length 11", Wt 2 lb  
Cat. No. MM-442D, Die Set Only, Wt 8 oz Cat. No. MM-440H, Handle Only, Length 11", Wt 1.5 lb

**ALL-PURPOSE SHEAR** Aviation-type snips cut carpet, vinyl, metal moldings, and just about any material. Hardened tool steel jaws are a full 1 3/8" long, have serrated edges to prevent slippage, and have a pointed shape to reach into corners and small places. Compound lever action makes it easy to cut even tough materials. Plastic grips for comfort. Locks closed for safety. A quality industrial tool.

Cat. No. MS-11, Length 10", Wt 14 oz

**MICA-NIFE™ LAMINATE EDGE FINISHER** A compact nylon body tool, it has a solid carbide cutter that neatly finishes laminate edges after routing. The self-guide shape assures the same angle of cut along the entire edge being finished. Cutting depth and angle (8° – 18°) are adjustable. Small and easy to carry, it's handy on the job, especially in tight corners. A good display item for the D.I.Y. trade.

Cat. No. MN-94, Wt 2 oz Cat. No. MN-95RP, Repl. Blade, Wt 1 oz

**BLOCK LAMINATE TRIMMER** The self-guide design allows this cutter to score laminate overhang up close to the panel edge. The carbide cutters at both ends allow scoring in either direction and both ways into inside corners. After scoring a few times, bend the overhang upward for a clean break. The edge is ready for final finishing. Handles up to 3/8" overhang. By reversing the platen, the tool will score 1 5/8" edging strips. Very useful for on-the-job trimming and for the D.I.Y. trade.

Cat. No. LT-886, Length 6 1/2", Wt 8 oz Cat. No. LT-886RP, Pkg of 2 Repl. Carbide Cutters, Wt 2 oz
