

QUICK CHUCK ADAPTER Convert any 3-jaw chuck so that it accepts the standard ANSI 1/4" hex power bit shank. With this adapter in your portable drill or drill press, you can snap in the 1/4" hex shank tools including drive bits, countersinks, magnetic bit holders, and drill adapters. No need to keep rechucking when a change between various drive tools is needed. Works with the INDIVIDUAL COUNTERSINKS and DRILL ADAPTERS shown on previous pages.
 Cat. No. QC-38A, Length 2 1/4", Wt 3 oz

See Price Page 5 & 6

MAGNETIC BIT HOLDER This is a popular system for power driving screws. The shank is a standard power driver 1/4" hex. The selected insert bit (Phillips, square, hex, torx, pozi) is inserted into the holder and an internal snap ring holds it in place. An internal magnet holds a screw onto the end of the drive bit so there is no need to hold the screw with the fingers. Saves time.
 Cat. No. MH-25, Length 3", Wt 1 oz

INSERT BITS These industrial quality 1/4" hex bits snap into any standard magnetic holder. With a Rockwell C hardness of 58-62, they resist damage and last much longer than ordinary bits. All are 1", and are packed 10/pkg, 100/box.

Cat. No. PB-1SM #1 Phillips, Cat. No. PB-2SM #2 Phillips, Cat. No. PB-3SM #3 Phillips,
 Cat. No. SQ-2SM #2 Square, Cat. No. PZ-2SM #2 Pozi Style

POWER SCREWDRIVER BITS Fit all standard 1/4" hex drivers. Rockwell C hardness of 58-62 assures exceptional life. All are packed 10/pkg, 100/box, 3 1/2" & 6" are 50/box.

Cat. No. PB-1SS, #1 Phillips, 2"L	Cat. No. SQ-1SS, #1 Square, 2"L
Cat. No. PB-2SS, #2 Phillips, 2"L	Cat. No. SQ-2SS, #2 Square, 2"L
Cat. No. PB-3SS, #3 Phillips, 2"L	Cat. No. SQ-3SS, #3 Square, 2"L
Cat. No. PB-1LS, #1 Phillips, 3 1/2"L	Cat. No. SQ-1LS, #1 Square, 3 1/2"L
Cat. No. PB-2LS, #2 Phillips, 3 1/2"L	Cat. No. SQ-2LS, #2 Square, 3 1/2"L
Cat. No. PB-3LS, #3 Phillips, 3 1/2"L	Cat. No. SQ-3LS, #3 Square, 3 1/2"L
Cat. No. PB-2XLS, #2 Phillips, 6"L	Cat. No. SQ-2XLS, #2 Square, 6"L

DOUBLE DRIVE POWER BITS These fit all standard 1/4" hex drivers. Double end gives double life and a spare tip on hand. All are packed 10/pkg, 100/box, 3 1/2" are 50/box.

Cat. No. PB-2SD, #2 Phillips, 1 3/4"L Cat. No. PB-2MD, #2 Phillips, 2 1/2"L
 Cat. No. SQ-2MD, #2 Square, 2 1/2"L Cat. No. PB-2LD, #2 Phillips, 3 1/2"L

MAGNETIC RING SCREW HOLDER

Strong enough to hold a 2 1/2" x #14 phillips screw. You have probably seen this used on TV woodworking shows. It is one of the handiest tools you'll ever use. Slip the Magnetic Ring onto your power screwdriver bit and the bit automatically becomes magnetic, screws will automatically hold onto the end of the bit. It will also work on manual screwdrivers, holding the screw onto the tip so that the screw can be inserted into tight locations. Fits any hex shank from 3/16" up to 1/4", and fits any round shank from 3/16" up to 19/64".

The Mag Ring produces a very strong magnetic field so that even long screws are held tightly. It slides on and off easily for use on other bits, and it does not add to the length of the bit as other devices do. After you try one, you may want several more for the convenience of having one on each of your most popular bits. This is a precision made device. Inside the brass ring are three recessed magnets that automatically emerge to grip the shank surface, but automatically retract when the bit is removed. Outside diameter of the brass ring is 13/16", thickness is 5/16". Weight is 1 oz. Blister packaged on a card for pegboard display. Packed 10 per box.

Cat. No. MR-3 (Mag Ring Only)
